## OIL OPERATIONS IN MEXICO EXTENSIVE

Gulf Coast Is Considered to Have Greatest Oil Producing Possibilities.

(Tampico.)  
During the last few years this section has been explored by expert engineers and geologists, with the result that it has been generally understood that the gulf coast of Mexico has great possibilities as an oil field. Over a score of companies, including the largest and most powerful oil interests in the world, have been engaged in the work of exploring and developing; millions of dollars have already been spent; hundreds of thousands of dollars worth of machinery has been imported for this purpose; a small army of engineers, geologists and drillers has been kept busy.

Until recently the only success obtained in this field in the immediate vicinity of Tampico was that of the Mexican Petroleum and Development company in which is shown as the Ebanco field about 25 miles from Tampico. The Pearson interests developed some wells in the Vera Cruz district, and had some little success in the Tuxpan region. During the last few months the Huasteca company met with some success in the Huasteca field, and recently the Mexican Fuel Oil company brought in a well at Toluca. During July, 1910, the East Coast Oil company, representing the Harri-man interests, was successful at well at Toluca and another at Panuco.

As a result of these successes, the value of leases has increased greatly. The companies already operating in this section include: The Mexican Petroleum company of California; the Huasteca Petroleum company, owned by the Doherty interests, and an allied company of California; the East Coast Oil company, which has yet no corporate existence, but which represents the Southern interests of Harri-man; the Mexican Fuel company, a Waters-Pierce Oil company concern; the Mexican Fuel Oil company, incorporated under the laws of West Virginia; the Des Banderes Oil and Gas company, an Arizona corporation; the American International Fuel and Petroleum company which was organized under Delaware statutes; a California corporation, the Tampico Petroleum company; the Standard Oil company of Mexico, with home offices in London; the Standard Oil company of England, with the same official personnel as the preceding company; the Hidalgo Petroleum company, composed of California parties; the Tampico Oil company (limited), an English organization. The operations of S. Pearson Sons & Co. have been very extensive.

The Elctra Petroleum company is being formed, under English law, to develop leased land near Juan de los Rios, 15 miles from Tampico, in California for work on a hacienda 50 miles up the Panuco river from Tampico, and a Salt Lake City company, which has a fruit farm near Caracol, has oil-drilling machinery on the way for sinking a well about 15 miles from Tampico.

Each day is bringing new developments. Outside of the fact that a number of companies had to cease operations until the close of the rainy season, the prospects are brighter than have ever been before, and it is confidently expected that the gulf coast will shortly become a great producing oil field.

**RALPH ROSE HERE; IS A BIG ATHLETE**  
(Continued from page one.)

west to one Michigan university, where Mr. Keene Pittspatrick, who is all his name implies, greeted him with outstretched hand. Ralph was the elephant act in the main ring of the big knowledge world circus.

He was made a member of the Tri Abita Pi fraternity, a member of the Baked Potato Pi Interfraternity, an honorary member of the society for the psychological research, and goodness knows what else. Ralph took a course consisting of Torts three hours, pleading and practice, two hours; Moot court, one hour weekly; contracts, partnership and the other required reading. He has been a globe trotter for six hours daily in the athletic department of that great and growing fountain of knowledge.

He attended the university until 1905 when the long drive for foreign lore seeped into his soul and he went to London for a whirl at old Bailey. After that the rest was easy. He hung out his shingle and went to it with the same dispatch and vigor that he had shown while an undergrad at Michigan.

The Tales They Told.  
Rose probably has had more stories of one kind and another written about himself than any one not in the prize fight game as a profession. Speaking of prize fighting, Ralph was touted to go against Jeffries when Jeffries was what he is not at the present time. He was no doubt a good fighter, but he is not in the underpinning of a box car, and various other equally unique and original stunts. Rose competed in the Olympic games at the St. Louis exposition and has been holding a globe trotter until he has a trunk full of cups, medals and other junk which he has won.

Other Olympic Members.  
The club which is the Olympic club which is here, it was to New Orleans are: Al Lean, who leads the party as athletic trainer, and Pete Gehardt, a sprinter, who will captain the team at New Orleans. Ed McCauley, a middle distance runner, will Garven, a long distance man; James Donahue, hurdler and broad jumper; "Leland Stanford" Scott, pole jumper, and William Martin, 100 yard man. N. W. Woolf is accompanying the team.

The party will leave tonight for New Orleans to participate in the meet of the Amateur Athletic union to begin Saturday next. This morning the visitors went to Juarez, and "worked out" on the race track grounds, to avoid "going to seed" on the long journey.
